

PRAVEEN DESAI

Full-Stack .NET Developer | AI / ML Engineer | Building Intelligent & Scalable Software Systems

+91 9148205394 | desaipraveen22@gmail.com | linkedin.com/in/praveen-desai-92b372260 | github.com/paanchjanya | Vijayapura, Karnataka, India

PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in **full-stack .NET development (C# & ASP.NET Core)** and **modern AI/ML engineering with Python and its ecosystem**. Proven ability to design and ship end-to-end software solutions — from **ASP.NET Core Web API and MVC applications** to deep learning pipelines and AI-powered chatbots. Strong academic record (CGPA 8.6), complemented by multiple industry certifications across cloud, AI, and software development.

EDUCATION

BLDEA's College of Engineering and Technology, Vijayapura | 2022 – 2026

Bachelor of Engineering (B.E.), Computer Science & Engineering | **CGPA: 8.6 / 10.0**

P D J Junior College & HR Secondary School, Vijayapura | 2017 – 2022

Class 10th: 88.32% | Class 12th: 94.00%

WORK EXPERIENCE

MindMatrixEd | Feb 2026 – May 2026 (15 Weeks / 90 Working Days)

Software Development Intern — Android Development & Generative AI

Android Studio | Kotlin | Jetpack Compose | Google Cloud AI

- Developed Android mobile applications integrating Generative AI features using Google Cloud APIs, delivering intelligent, context-aware experiences for end users.
- Designed and implemented responsive UI components using Jetpack Compose, adhering to Material Design 3 guidelines for a modern and accessible user interface.
- Applied Kotlin programming fundamentals to build clean, maintainable application logic covering data handling, navigation, and state management.
- Collaborated in an agile team environment to plan, develop, and test AI-powered features across a structured 15-week / 90-day software delivery cycle.

TECHNICAL SKILLS

⚡ Core Specializations

- Full-Stack .NET:** C# | ASP.NET Core | Web API | MVC | Entity Framework Core (EF Core) | Blazor
- AI / ML with Python:** TensorFlow | PyTorch | Scikit-learn | Hugging Face | NLP | Computer Vision | LLM | RAG | Streamlit

Languages: C# (ASP.NET Core) | Python | SQL | MongoDB | JavaScript | TypeScript

Full-Stack Development: Frontend: JavaScript, TypeScript, Angular, Blazor | Backend: ASP.NET Core, Web API, MVC, Entity Framework Core (EF Core)

AI / ML & GenAI: Machine Learning (Supervised, Unsupervised, Deep Learning) | Computer Vision | NLP | LLM | Generative AI | RAG | Prompt Engineering

Frameworks & Libraries: ASP.NET Core | Blazor | Streamlit | TensorFlow | Scikit-learn | PyTorch | Pandas | NumPy | Matplotlib | OpenCV

Cloud & DevOps: Google Cloud | AWS (EC2, S3) | CI/CD Tools (Jenkins, GitLab)

Tools & Platforms: Visual Studio (IDE) | Git — Version Control | GitHub | Google Colab | Google AI Studio | Claude Code

PROJECTS

Full-Stack .NET Projects

Task Management System (Trello / Jira Lite) 2024

C# | ASP.NET Core MVC | Web API | Entity Framework Core | SQL Server | Angular

- Built a full-stack task management web application with Kanban boards, task assignment, priority levels, and due-date tracking — inspired by Trello and Jira workflows — using ASP.NET Core Web API and EF Core.

- Implemented role-based access control (Admin, Manager, Member) with JWT authentication and SQL Server persistence, ensuring secure and scoped task visibility across teams.

Employee Leave Management System 2024

C# | ASP.NET Core Web API | Blazor | Entity Framework Core | SQL Server

- Developed an end-to-end leave management platform enabling employees to apply for leave, managers to approve or reject requests, and admins to configure policies — built with ASP.NET Core Web API and Blazor.
- Integrated role-based workflows (Employee, Manager, HR Admin) with a responsive leave calendar dashboard, balance summaries, and audit logging for complete traceability.

Online Exam / Quiz Application 2025

C# | ASP.NET Core Web API | Angular | Entity Framework Core | SQL Server

- Built a full-stack examination platform with timed quizzes, randomized question ordering, multiple question types, and auto-graded scoring — powered by ASP.NET Core Web API and Angular.
- Designed a question bank management system for instructors with difficulty tagging and a real-time results dashboard with score breakdowns and exportable performance reports.

Blog / Content Management System (CMS) 2025

C# | ASP.NET Core MVC | Entity Framework Core | SQL Server | Blazor

- Engineered a full-featured CMS using ASP.NET Core MVC enabling authors to create, schedule, and publish blog content with rich-text editing, category tagging, and SEO-friendly URL routing.
- Implemented multi-role user management (Admin, Author, Reader) with draft/publish workflows, full-text search, comment sections, and dynamic category filtering on the public-facing frontend.

AI / ML Projects

AI Agentic Chatbot — Contextual Word Definition Assistant 2024

Python | Gemini API | LLM | Generative AI | Image Generation

- Built an AI-powered agentic chatbot using the Gemini API that provides precise word definitions enriched with contextual usage examples, sentence structures, and semantic explanations.
- Integrated image generation capabilities to produce visual representations that reinforce word meanings and improve comprehension.
- Architected a multi-turn conversational model with context retention, enabling the agent to handle complex follow-up queries and dynamic user interactions.

3D Lung Medical Image Reconstruction & Visualization 2025

Python | TensorFlow | OpenCV | Computer Vision | Deep Learning | DICOM

- Engineered an end-to-end deep learning pipeline to reconstruct and visualize 3D anatomical structures of lungs from medical imaging data (DICOM / CT scans), enabling precise pre-surgical planning.
- Applied Computer Vision and image segmentation techniques to process raw scan data and generate high-fidelity 3D lung models optimized for clinical use.
- Improved anatomical visualization accuracy, contributing to measurable reductions in operation planning time and enhanced precision in minimally invasive lung surgeries.

CERTIFICATIONS & COURSES

- AWS Educate Badges — Compute, Security, Serverless, Storage, Networking, Database | Amazon Web Services
- Full-Stack Generative and Agentic AI with Python (LLMs, RAG, Agents, LangGraph) | Udemy
- Generative AI Fundamentals Course Badge | Google Cloud
- Claude 101 — Introduction to AI & Prompt Engineering | Anthropic
- Foundational C# with Microsoft | freeCodeCamp.org / Microsoft
- Node.js and TypeScript | Scaler
- Data Analytics Essentials | Cisco
- Coding for Visual Learning: JavaScript with p5.js and Three.js
- Canva 200 Design Milestone Badge | Canva

CORE COMPETENCIES

Team Collaboration | Problem Solving | Agile Workflows | Technical Communication | Adaptability | Cross-Functional Collaboration | Growth Mindset | Accountability
